

# Swipe. Approve. Work.

# What Is Rapid Access Systems?

What if there was an easier way to verify employees and contractors coming on site through an online hosted software solution that requires no data entry? There is with Rapid Access Systems from Rapid Global.

Rapid Access Systems software and hardware is the easiest way to verify and grant onsite access to employees and contractors. Rapid Access Systems is perfect for companies who have site security concerns, distinct site boundaries, guarded access points or multiple sites.

If your company is concerned about personnel or contractors starting work without the correct inductions, licences or permits, then Rapid Access Systems is the best access management tool to streamline and control entry.

Some of Australia's biggest companies like Ford, Powerwater, Ausgrid and Mirvac already rely on Rapid Global to grant access to their employees and contractors. From property management, to transport and manufacturing, a Rapid Access System can be designed to suit any business category or industry.

Rapid Access Systems is simply the most streamlined way of getting the right people on the right job at the right time.

## What Makes Rapid Access Systems Different?

There are many systems in the marketplace that provide on site sign in, but Rapid Access Systems provides so much more than just access. The system links with other Rapid Global products such as Rapid Induct and Rapid Contractor Management to provide a comprehensive picture of the compliance of both the individual worker and their company. Only fully compliant workers from compliant companies are provided access to enter the site.

*Branded swipe cards used to quickly sign in.*

## Rapid Global Products Integration

Rapid Access Systems can also be combined with other Rapid Global software solutions to create greater efficiencies and perform related tasks:

**Rapid Induct** software allows inductions to be completed prior to arrival on site.

**Rapid Contractor Management** software prevents non-compliant contractors from entering a site. Documents collected in Rapid Contractor Management are tracked and displayed on terminal screens on site. If a document such as a company's insurance has expired then the workers' access to the site is denied.

**Rapid Incident Reporting** software allows a contractor to be included in incident reports or to report an incident from the on site terminal.

**Rapid Permit To Work** software allows a contractor to request permits online prior to arrival on site and then displays permits when signing in to the terminal on site.

## Features

Rapid Access Systems is the most intelligent software in its class with a wide range of unrivalled product features and benefits:

- Suitable for a variety of worksite applications and environments.
- Cross checks with employee and contractor database.
- Uses a swipe card system for checking of worker's credentials and licenses.
- Option to include an on site photo and on the spot card printing.
- Has the ability to display warnings and alerts to ensure all workers are advised of safety notices.
- Checks the status of inductions.
- Displays emergency information.
- Work orders are chosen and responsibility checked.
- Clearance to work/permits able to be integrated (Rapid Permit To Work)
- Contractor sign in and sign out.
- Track employee hours. Employees swipe in and out using data card.
- Able to integrate with Rapid Incident Reporting to allow for reporting of incidents via touchscreen.
- Able to integrate with alcohol testing units.
- Option to integrate with key access units such as Key Watcher.

## Systems Able To Include

*Card printers*

*Key access locker systems*

*Breath Tester*

*Label Printer*

## Main Benefits

- An easy way to verify the contractor coming on site.
- No data entry required.
- Access will be available at all locations.
- Fully hosted online solution.
- An evacuation report of all visitors on site.
- Contractor hours are able to be monitored.
- Notifications to on site personnel of worker arrival.
- The solution is scalable with the ability to easily grow.

## How Rapid Access Systems Work

Prior to arriving on site, workers can complete their inductions and provide documentation such as insurance certificates. On arrival to the site, workers can sign in to the access system terminal using their pre-delivered ID card or print an ID card on the spot. The system will search the database to find the compliance status of the individual (i.e. induction completed, documentation up to date) and display alerts or deny access if company documents are expired or if induction is not complete. There is even an option to complete induction and provide new documents on the spot.

An extension of Rapid Induct, Rapid Access Systems provide hardware such as kiosks, turnstiles and swipe card entry systems as well as online hosted software for the control of on-site access to your workplace. Used in conjunction with data enabled ID cards issued through the Rapid Induct and Rapid Contractor Management systems, Rapid Access systems ensure entry to your site is restricted to only fully inducted and compliant workers.

## Visitor Sign In Solution

Revolutionise the way you welcome visitors and contractors to your site or building. Rapid Access System is available as a touch-screen or tablet solution providing point of entry electronic sign in for all your visitors.

Greet your visitors and contractors with a sign in process that is state of the art technology. Suitable for both manned and unmanned stations, the Rapid Access System provides point of entry sign in and record of attendance. Safety site induction information and site maps are displayed to each visitor. Visitors select from a list the person they are visiting and the host is notified immediately via SMS and email! Also includes on the spot automated label printing for each visitor.

Rapid Access System ensures you present at your best to every visitor on arrival and is simply the easiest and most affordable way to manage site visitor attendance.

## Visitor Management

Rapid Access Systems is a powerful easy to use visitor sign in solution. Need to categorise your visitors and present each type with a different short induction? No problem! Rapid Access Systems is flexible and can be set up to manage all types of visitors including contractors and employees from other sites.

**Feel confident in  
managing your visitors  
in every situation!**

## Your Site Gatekeeper

- ✓ Impressive
- ✓ Practical
- ✓ Secure
- ✓ Reliable
- ✓ Scalable
- ✓ Flexible

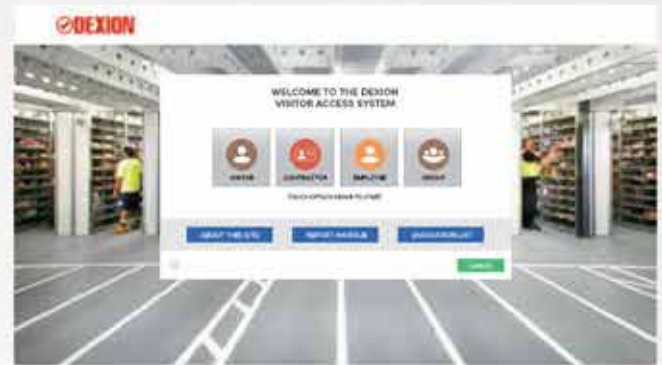

Use as a simple visitor sign in system or a sophisticated site access gate keeper.

Scalable to provide the features and level of complexity your business requires.

## Visitor Management Features

- Visitor sign in and sign out
- Auto SMS and email notification of visitor arrival
- Includes safety induction and site maps
- Instant evacuation list printing and online view
- Touch screen, iPad and tablet options
- Printed labels or ID cards
- Photo ID of visitor
- Collect visitor contact information
- Option to manage and track contractor hours
- Includes ability for visitor to report any incidents
- Use as a visitor sign in system or combine with Rapid Contractor Management for a full contractor on site arrival system!

## Main Benefits

First impressions are everything! Rapid Access Systems put your best foot forward from the moment your visitor walks in the door whilst providing the benefits of:

- Immediate access to reliable records of site attendance
- Flexible for all environments
- Improves site safety and security
- Provides confidence with auditable records
- Economical and environmentally friendly solution
- Privacy of other visitor information compared to paper visitor book
- Emergency evacuation peace of mind

**Receive instant SMS and email alerts when your visitor arrives!**
